NAACE

THE EDUCATION TECHNOLOGY ASSOCIATION

Naace is a community of teachers, school leaders, advisors, consultants and EdTech suppliers working across all areas of UK education.

Whether it's teaching, learning, management or administration, we share a vision for using technology to improve outcomes and advance education.

The Naace Self Review Framework SRF

The Naace Self Review Framework (SRF) helps schools to:

→ **Understand where they are in their technology strategy**
→ **Plan the next stages of their technology strategy**
→ **Record their progress**

The SRF encourages the effective use of edtech throughout school life – not just in teaching and learning, but in administration, communication and beyond. It helps schools plan, streamline and get best value from their education technology.

The framework has been in existence for over twenty years and is regularly updated to reflect the changing scene of technology in schools. To date, over 16,000 schools have taken advantage of the SRF online system.

bett
AWARDS 2020
FINALIST

Nominated for the Naace Self Review Framework

> *"By modelling our progress against the advice within the SRF, we gain a very accurate picture of where our strengths lie, and where we can improve. This has been especially good in preparing for the curriculum 'deep-dives' in the new Ofsted inspection format."*

> JOANNE KAYE, COMPUTING SUBJECT LEADER AT ST BEDE'S CATHOLIC JUNIOR SCHOOL, CHESHIRE

NaaceMark

→ NaaceMark is an award available to schools that have achieved level 2 across all elements of the Naace Self Review Framework (SRF).

NAACE
THE EDUCATION TECHNOLOGY ASSOCIATION
NAACEMARK
EXCELLENCE IN EDUCATION TECHNOLOGY
2020

Schools applying for the NaaceMark school will be allocated an accredited assessor, whose judgment will be moderated by a secondary assessor.The assessor will take the time to meet a representative sample of all stakeholders in the school, from pupils to parents to governors and the SLT, and collate evidence as to how the school is using technology to advance education.

The assessor will draft a report for the school with a detailed assessment of their findings and recommendations. Pending agreement, the school is formally recognised as having achieved the NaaceMark award and will receive its certificates, the NaaceMark logo and badge. The award is valid for three years.

'The report was clearly set out and highlighted the strengths of our school and has also given us plenty of improvement opportunities for the future. I can feedback this information to the rest of the staff and set out clear expectations within or curriculum area for the years to come. The visit was extremely useful and made me think about how I can make improve-ments and make our school even more efficient in using computing and technology to support the children within our school."

CRANBERRY ACADEMY

Third Millennium Learning Award

→ The Third Millennium Learning Award is the natural next step for schools that have gained the NaaceMark award.

NAACE
THE EDUCATION TECHNOLOGY ASSOCIATION
THIRD MILLENNIUM LEARNING AWARD
2020

The Third Millennium Learning Award (3MLA) celebrates schools' achievements in creating an environment and curriculum that stimulate learning experiences, making use of the opportunities presented by technology.

The application for the award involves:

- creating a five-minute video aimed at parents exemplifying the use of education technology at the school
- creating a ten-minute explanatory video which explains the school's approach to making the initial video

Two assessors are allocated by NAACE to review the entry. The guides use a 3MLA Chart to show which how technology is being used effectively across different areas of the school.

Assessors will write an independent report on the school's submission and agree an outcome.

The school's videos are made available to the Naace website and the Naace 3MLA YouTube channel - visit

Success Story

St Bede's Catholic Junior School, Cheshire

Integrating edtech into school life using the Self Review Framework

St Bede's has been committed to its edtech journey for a long time, and has upheld its NaaceMark Award for the past 15 years.

Joanne Kaye, Computing Subject Leader, comments:

"St Bede's has been using the SRF almost as long as it's been available! We're proud of our NaaceMark Award. It helps us to keep improving our edtech provisions, and showcase the great work that we're doing."

The school's subject leaders ensure that their action plans are created with reference to the SRF, so that the implementation of the curriculum is planned with respect to the educational technologies available at St Bede's.

Using the SRF, the school has refined its procurement process, focusing in on effective technologies which make a tangible difference. As such, budgets have been streamlined and teachers are working to ensure they make the most of the resources that are introduced.

Joanne also commented on the benefits of the SRF in terms of maintaining standards, saying: "By modelling our progress against the advice within the SRF, we gain a very accurate picture of where our strengths lie, and where we can improve. This has been especially good in preparing for the curriculum 'deep-dives' in the new Ofsted inspection format."

"The NaaceMark Award is a kite-mark for us, showing that we are reaching the standards that we strive to deliver. We are proud of the award and share the achievement with parents, stakeholders, and the wider community.

Membership Opportunities

Join our community of educators, thought leaders and curriculum experts who are committed to supporting the effective use of education technology within schools.

Becoming a member allows you to create connections with other members, grow your knowledge base and find out about ways to save you (and your school) valuable time and money.
